IPF 40

equipment for bagging
pet food/cat litter
sector products

■ **Flexible**

■ **Versatile**

■ **Productive**

■ **Automatic**

■ **Low running costs**

Dear Customer,

The CONCETTI GROUP, always sensitive to market trends, has recently developed new and **completely automatic** equipment for bagging **pet food/cat litter** sector products: the **IPF 40**.

This system boasts several special characteristics:

- **Flexibility:** suitable for processing bags between 0.5 and 7.5 Kg;
- **Versatility:** handles flat or pleated bags, in paper, polythene coated paper, PE and aluminium;
- **Production:** up to 2300 bags/hour;
- **Highly automated:** size changeover is fast and automatic. The machine features two self-adjusting bag grippers that make it possible to change from one bag size to the next one in just a few seconds;
- **Low running costs:** user-friendly so no specialist staff required to operate it.

The new plant's extensive capacity will allow you to amortise your investment in no time at all.

Top quality components and materials will drastically reduce maintenance interventions.

Our technical sales force is at your complete disposal for any further indications you may need.

Best regards

CONCETTI GROUP
